DEDICATION

James Underwood Crockett
"Jim"

Horticulture

1915. Alpha Tau Gamma.

Few of us knew the real "Jim" in his first few months up here as he was a quiet, self-contained chap. But as the time went on his inimitable humor won many laughs. His favorite hobby is taking pictures of "Mac" and exposing them. We are sure that his good scholarship and willingness to uphold high ideals will win him great accomplishments someday.

Haverhill

The 1980 Yearbook Staff takes great pride and admiration in dedicating the book in memory of James Underwood Crockett.

He was a man of vast talent and intelligence when it came to plants. From the time he was a very young boy he showed an inclination towards horticulture. At the age of three he was planting seeds in teacups and his later school activities with the local 4-H made his reputation grow. He graduated from Stockbridge in 1935 with a degree in Ornamental Horticulture. After graduating he worked at various greenhouses and nurseries around the United States. Then went on to pursue horticultural studies at Texas A&M College.

Following wartime service in the Navy, he started a retail flower business in Lexington, MA. He was able to communicate with his customers extensively. Through his contacts he realized that people were not as aware of plant care as he thought. He then began to issue a monthly pamphlet of instructions **Flowery Talks**. The pamphlets brought him much success and he pursued a full-time writing

career. In this career he wrote 18 books including the 12 volume Time-Life encyclopedia of gardening.

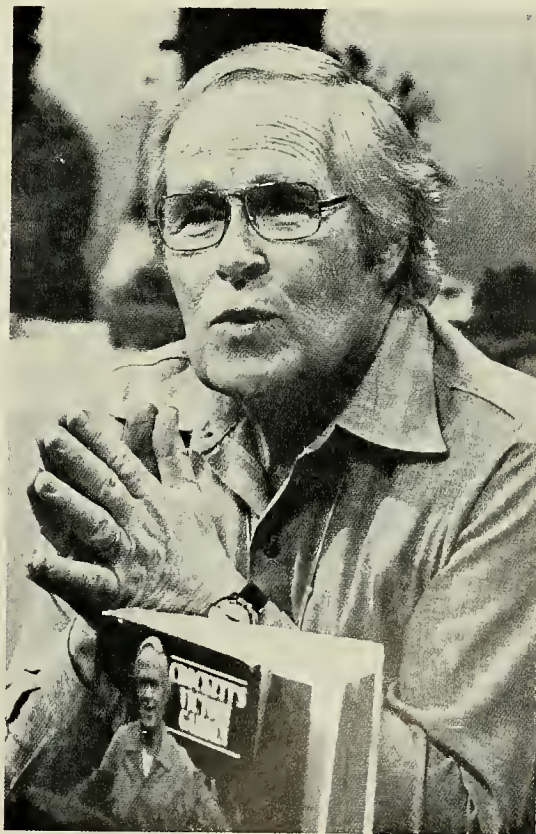

During all his work he managed to travel a great deal to various botanical and private gardens around the country.

In 1975 when most people of his age would be considering retirement he was starting a new career in television. A star was born to say the least. With WGBH T.V. station in Boston, MA. he began a weekly show "Crocketts Victory Garden". It became a household word in many homes and in 1978 he received a national emmy nomination for the series.

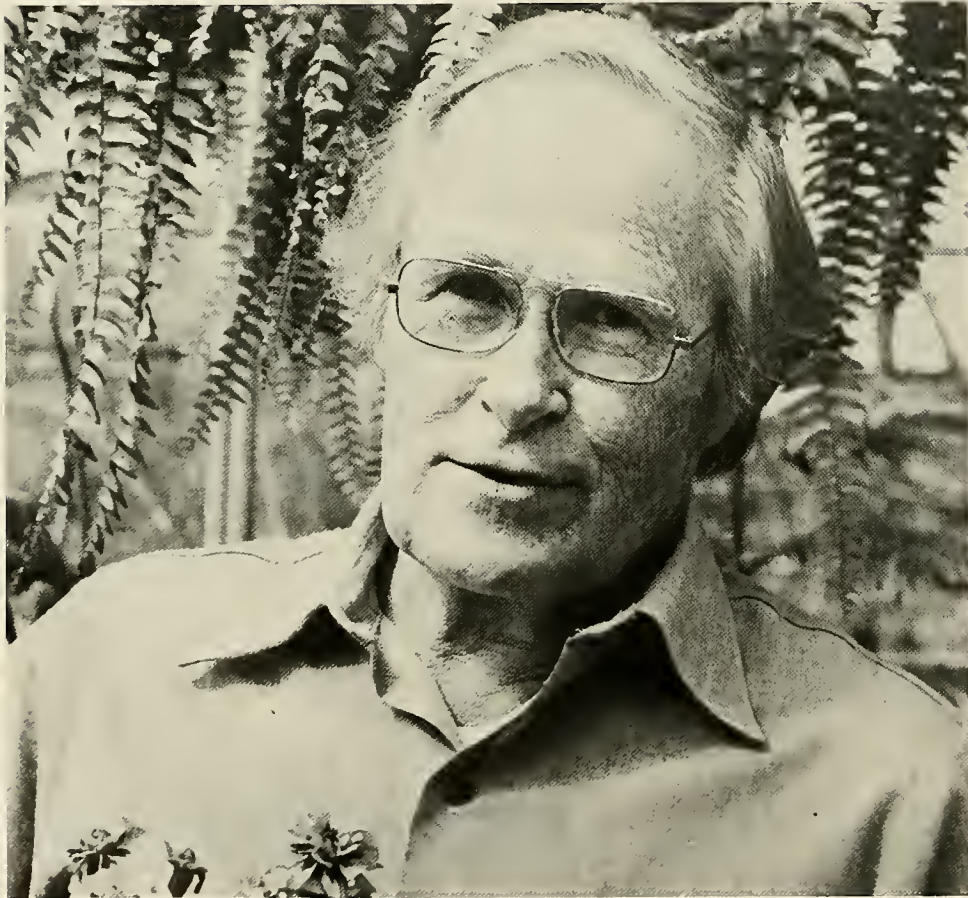

His approach to gardening was flexible, experimental, practical and humanistic. "There is a kinship among those who love growing things," he said. "Man's position in the scheme of things is to discern and use his judgement as to which things are valuable and which are not. And it certainly is true that the natural world has an enormous number of lessons which we would do well to pay attention to."

There is much to be learned from a man like Jim Crockett. He was a

man that liked to learn and more important liked to teach and has a unique personality to teach. He was a man that should be respected by all and all should be given the privilege of learning what he had to offer.

In the spring of 1977, Mr. Crockett worked as a volunteer for the Phone-a-thon.

No One Ever Said It Would Be Easy!

Most of my friends would sure agree that the road to their present positions was not easy or smooth. Even today, it is not easy to move ahead toward one's perceived goal(s). None of us were prepared to live with double digit inflation or such uneasiness in the world around us. I am quite sure most of you were not either. It seems to me, that during each and every week, we have to devise something new and/or different to keep abreast of the many changes coming at us from all sides.

Well, it is most certain that you, the Class of 1980, are going to find a few snags and hurdles in your future paths. Obtaining adequate lines of credit to purchase or enter business will be tough. Going on to more education is going to be more expensive each year. Many of you going to work in the business world will find that you

may have to start at a salary lower than what you think you are worth. Some of you may have to accept a job not wholly to your liking in order to get started. Like I said before, "No one ever said it would be easy"!

As some would say "so what else is new?" I think that most of you understand what I am saying and will work hard, plan carefully and find the best path to follow to reach your goal(s). The faculty, staff, and those of

us in administration are pleased that we have had a part in helping you start on that path to success. Our wish for you - stay happy, stay healthy, be persistent, be positive, be successful and be an active Stockbridge alumnus!

Dean R.

TO THE CLASS OF 1980

You are now leaving us to start a new life and a new decade. What kind of a life will it be? How will you meet this new challenge? It's all up to you. You can create a wonderful life for yourself and I hope that you will. On "Good Morning America", David Hartman does not say, "Have a good day!" He always says, "Make it a good day!" Note his deliberate choice of the verb "make". You are the one who can make a day good. And day by day, you can make your life a good one.

I do not really worry about your material future. Some of you plan to go on for more schooling and some will find immediate employment. Whatever you do, I know you will do it to the best of your ability, for Stockbridge students have always been mature, well-adjusted, responsible and energetic. I also believe that you will continue to grow and to learn, whether formally or informally. Your education here has opened doors for you and I know you will continue to keep those doors open.

Most sincerely, I wish you happiness and contentment. Happiness is mostly a matter of attitude, isn't it? Basically it is how we look at things. Some people see only the worst in any situation. Others look for the best - and find it! Strive to be one of these people. Cultivate the qualities of tolerance, compassion, enthusiasm and, most of all optimism. Make yourself into the kind of person you like, for if you like yourself you will be happy.

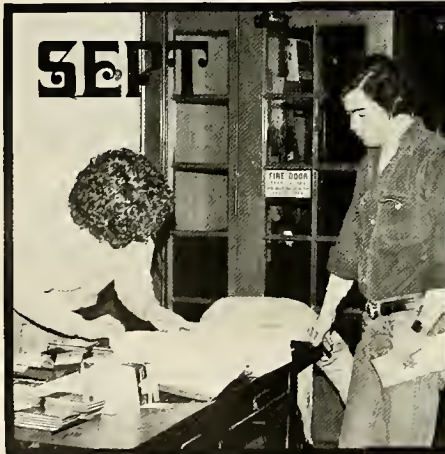

We will miss you. Do not forget us, for we will not forget you. We, who remain at Stockbridge, will always be interested in you and your progress and we hope that you will maintain your contact with us. Good luck and God Bless You

Louise Mae Reynolds

SENATE

President Jablonski and members of Senate at work.

Terri Peckham and Alumnist

(I can't wait until the end of this meeting)

SENATORS AT WORK

The Student Senate of the Stockbridge School has had a productive and enjoyable year. Comprised of representatives from each major and club, the senate oversees the spending and budgeting of the RSO appropriated funds. The senators are the governing body representing the students, keeping the students up to date on the results of the meetings, announcements and encouraging involvement in the senate activities.

The accomplishments of the senate are just a small part of the general business which the senate conducts throughout the year. It is the biggest link between majors, bringing students from different fields together. Without the senate, Stockbridge would be without unity.

This year the Senate was lead by President, Sally Jablonski; Vice President, Tom Maeder; Executive Secretary, Kim Barter; Senate Secretary, Donna Lozier; and the group was advised by Dr. Doug Airhart.

SENATE

Senate Wins!

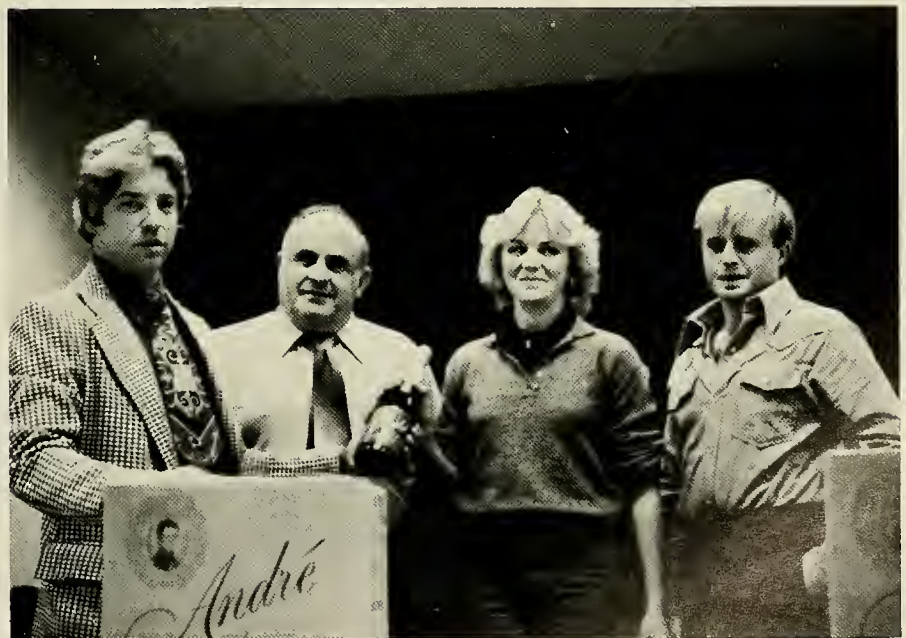

The sixth annual Alumni Phonathon was held in Alumni Hall in November 1979 from 7-10pm. It was the most successful phonathon, raising \$12,000. This money goes for Scholarships, reunions, Alumni newsletters, and directors. This year the Senate was the top winner.

Me? I don't touch the stuff.

Kevin Hollister '78 presenting the Senate with the Cold Duck.

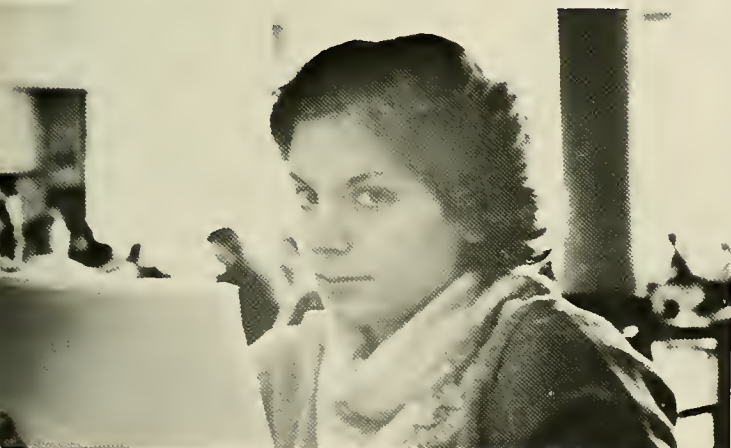

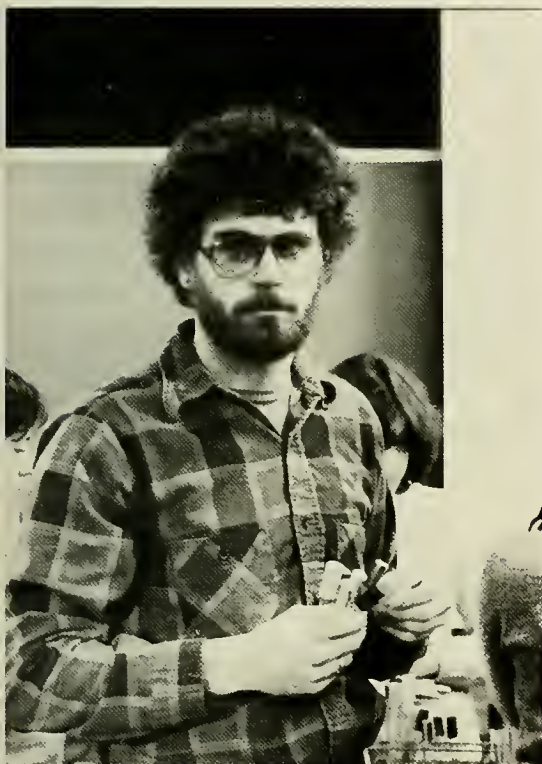

President Sally Jablonski accepting the case of Cold Duck.

AG BUSINESS

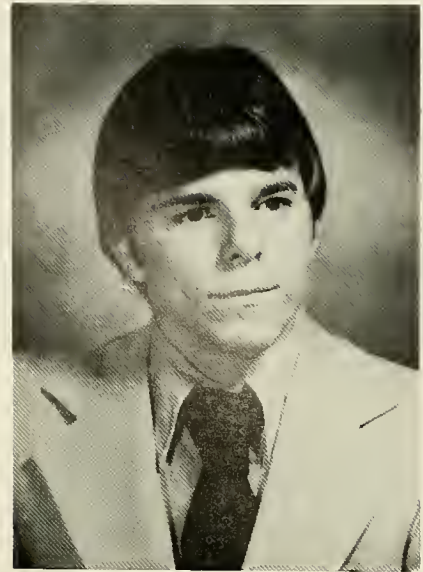

Agricultural Business Management, composed of only a small group of students working hard to learn the intricacies of Agriculture as a business.

We all know that agriculture is a business, but not all know the bookkeeping, accounting and law that lies behind it. It is a very important major and there shall always be a need for the basics that this major offers.

ANIMAL

SCIENCE

The course of instruction offered affords the student the opportunity to gain a working knowledge with farm animals. Courses in Poultry management, Dairy management, and Livestock production are among those offered. Students have a great opportunity to obtain practical experience in these fields at the Poultry Research Center and Riding Academy at Tilson Farm; and at the Dairy Facility which is located in South Deerfield. With the need for more and more experienced people in the Animal Science fields, the curriculum offered at Stockbridge is second to none; whether you want to be a Veterinary Assistant Farmer, or just work with animals.

ARBOR & PARK

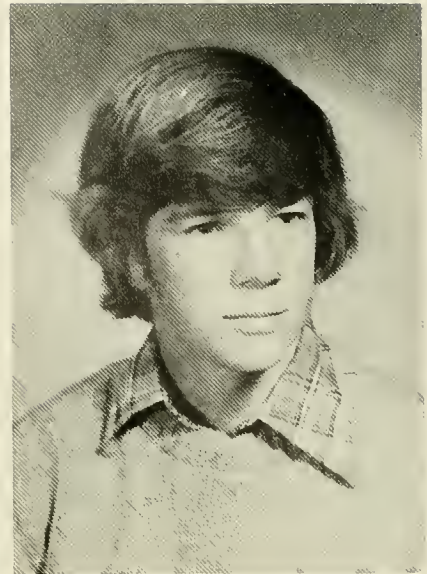

Arboriculture courses consist of the identification and treatment of tree diseases and insect pests, mechanical injuries, large tree removal and fertilizing. This program also covers learning to climb trees, using ropes with safety standards and how to operate chainsaws.

Park management prepares the student for different aspects of land use. The course consists of general forest management, park formation and expansion to meet the public needs. This information learned at Stockbridge will be valuable when students graduate from the school.

Placement is required for the second semester freshman. The on the job training will expand their knowledge in the field. Some jobs that the Arbor and Park management students can look for are, working in the recreational areas, in both municipal and national parks, land-use planners, park managers, city and state recreational coordinator.

HOT SUMMER DAYS.

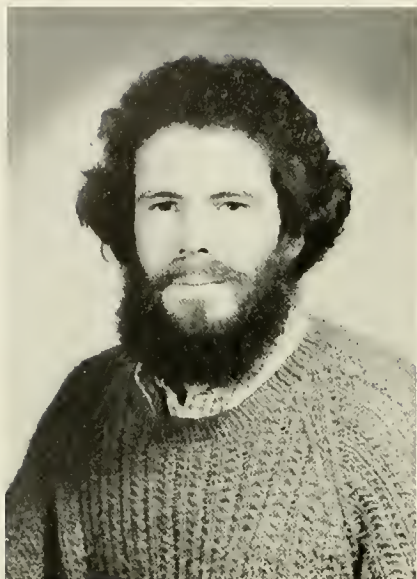

FLORI

The Flori's were very involved with activities in school from the very beginning. As friends we shared many fun times, as classmates we helped one another overcome the rough days, as people we grew and learned together.

MEMORIES ... freshmen orientation, volleyball, six A.M. field trips, aphid, placement reports, pumpkin sale, "Do we need to know this?", Portland, Maine and broken fan belts, those crazy get togethers, and those good old crop rotations ... We will change as the days pass and yet the memories will always stay the same — forever.

F-R-U-I-T AND VEG

This two-year program at Stockbridge offers the basic principles of plant growth which underlie sound cultural practices and the economic factors which bear upon the marketing procedures and the business side of the students specialized interest in the field of fruits and vegetable crops.

The job opportunities include a wide variety of areas in which

to work. Skilled trained workers are needed as foreman, operators, or owners on fruits and vegetable farms; employees on private estates and institutions; salesmen for various supplies, equipment and machinery companies; private and state produce inspection work; wholesale and in many business and industry operations with produce.

L A T

In the past few years, there has been an increasing demand for formally trained personnel in the field of Laboratory Animal Technology. This demand has arisen from a number of factors; the most obvious being the recent war on cancer where a skyrocketing number of research animals are needed. Other factors such as drug, surgical and control work are in need of research animals and the laboratory animal technologist.

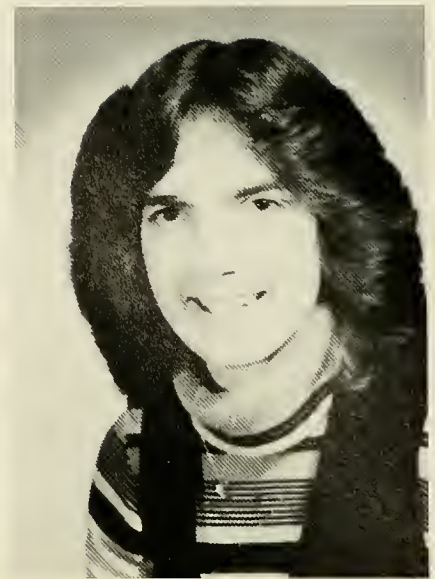

Knowledge of breeding and management is required for these animals and at the Stockbridge School of Agriculture, a two year program is designed to provide a broad base of training in the areas where technologists are most needed, i.e. breeding, management and laboratory techniques. The program meets the educational requirements for certification by the American Association for Laboratory Animal Science and also offers an Associate Degree in Applied Science.

Upon completion of the course, the Laboratory Animal Technologist can be employed by commercial production facilities, private and governmental animal research laboratories, technical sales and services and some graduates may be employed as assistants to veterinarians in private practice.

Working with animals requires a special kind of person. The person has to be kind, yet stern, calm, yet quick to react. This program includes this type of training. The Laboratory Animal Technologist from Stockbridge is that kind of person.

WHAT DID I DO TO DESERVE THIS?

— LAND — OP —

There is a great deal of pleasure to everyone, when one views a beautifully landscaped ground. Interest in this has created a demand for people trained to handle the problems encountered in landscape construction and maintenance.

The two-year Land Operations program at Stockbridge is designed to acquaint the students with the basic knowledge of the problems encountered in landscaping. The courses deal with plant growth, soils, fertilizers and plant pests; with the identification and maintenance of herbaceous plants and turf grasses; with shade tree maintenance; and with plant propagation. The curriculum also included, a five month formal course work placement period.

Job opportunities include, plant propagators, foreman or superintendent for nurseries; gardeners, foreman or superintendents on private estates, public parks, cemeteries, botanical gardens and various other public and private institution grounds.

MEMORIES OF STOCKBRIDGE DAYS

TURF

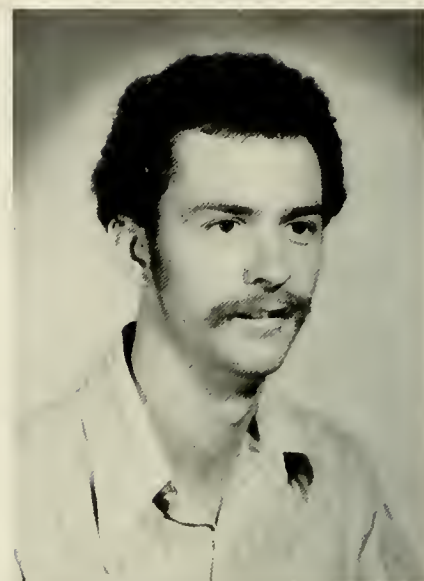

Our first year courses deal with the basics of understanding soils and plants, with specific courses dealing with turf management. In the short spring semester more specific courses are covered again, such as, golf course green construction and drainage.

Each spring during the first week of March all turf majors attend the Massachusetts Turf-grass Conference at the Springfield Civic Center for three days. The conference consists of a large industrial show, and daily speakers covering topics in the field. It is a very good happening where much can be learned and jobs can be gained.

RETIRED THIS YEAR AFTER SERVING
STOCKBRIDGE FAITHFULLY FOR MANY
YEARS.

SPORTS

SOCCER

This years Soccer Squad put together a successful season. Finishing with a satisfying record of 3-2-1. Team members were overly enthusiastic and could be found practicing in the fields rain or shine. The players devotion to the game enabled them to accept their losses as well as their wins. Team members enjoyed each others company on and off the field and the returning Freshmen are anxious to begin another season next fall.

B A S K E T B A L L

This years Basketball team had a trying season with a seasonal record of 3-9. The team proved to be a hard working group. Together they practiced, played games, and worked well to fight against more advanced and tougher teams. Most games ended in a close score of a two or three point difference.

With many returning players, and maybe a better cheering section, the Stockbridge team should be able to have a good season next year.

The team was coached by, Mr. Tony Williams.

During the spring many Stockies enjoyed the warm days out playing softball.

Generally it was the Turf guys against Land Op. but many others also joined in the fun.

What a great way to end a hectic school day!

SOFTBALL

GOLF

NEW CONCEPT HYDROPONIC GARDENING

Jack Topham, a former Stockbridge student, gave a demonstration at Twillingate Gardens in Sudbury, Mass to the Floriculture class. The demonstration concerned the process of Hydroponic gardening. So far, he has been producing cucumbers and selling them to nearby Grocers.

This is a relatively new concept in growing and so far seems to be working very well. The cukes are grown in troughs of a mineral solution and water. Supported by horizontal strings, the plants are able to get the maximum benefits from the light. Sanitation in hydroponic gardening is of the utmost importance.

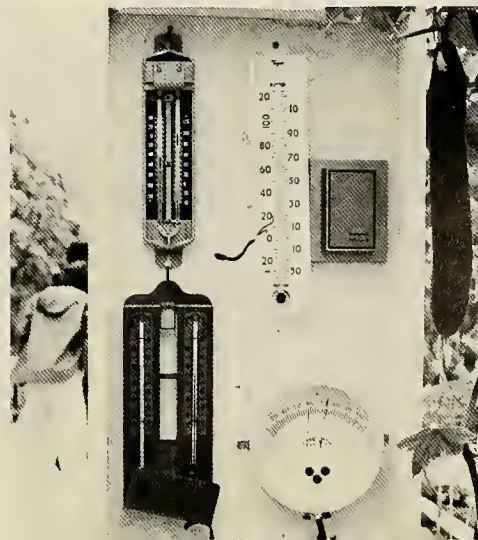

Good Luck, Jack!

Jack Topham, class of 1979

You Don't Say ...

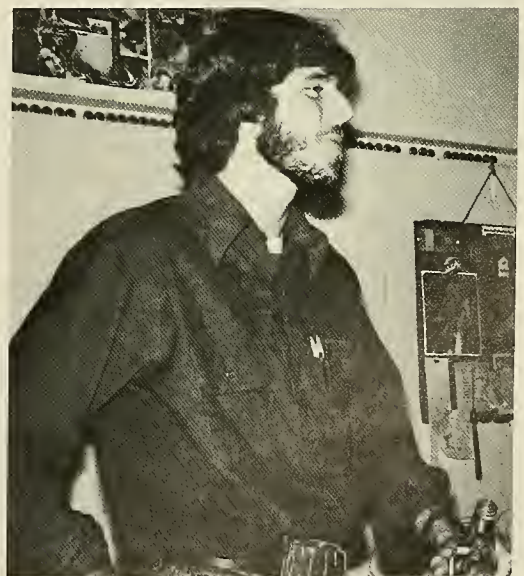

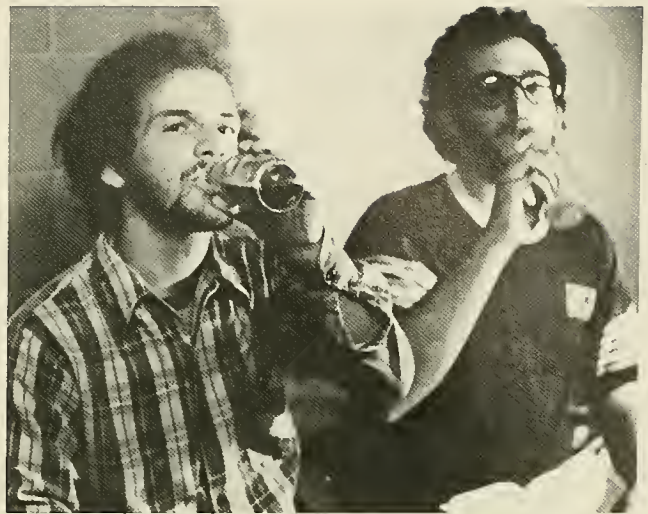

SHORTHORN

The Shorthorn was put together this year by the sole effort of Bill Cybulski. He was the one man team who kept the Shorthorn on its feet. The work includes writing, typing, printing, stapling and distributing. He succeeded in keeping the students informed on school activities, poetry, humor, school policy decisions and short stories. As with any school activity, there are always complications and problems with budget cuts, but Bill has managed to work around these hurdles and put out a very unique paper. The students of the Stockbridge School are grateful for all the time and hard work which Bill has put into keeping us informed.

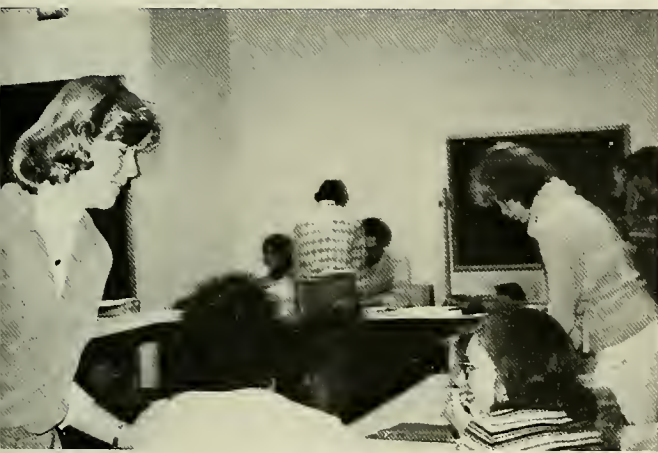

FRESHMEN FACES

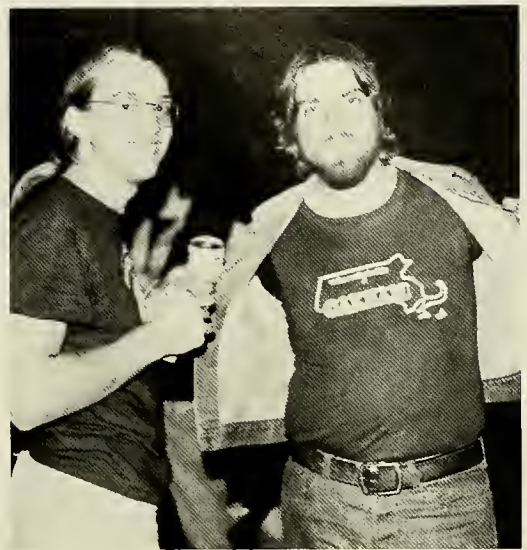

SPECIAL EVENTS

FALL PICNIC

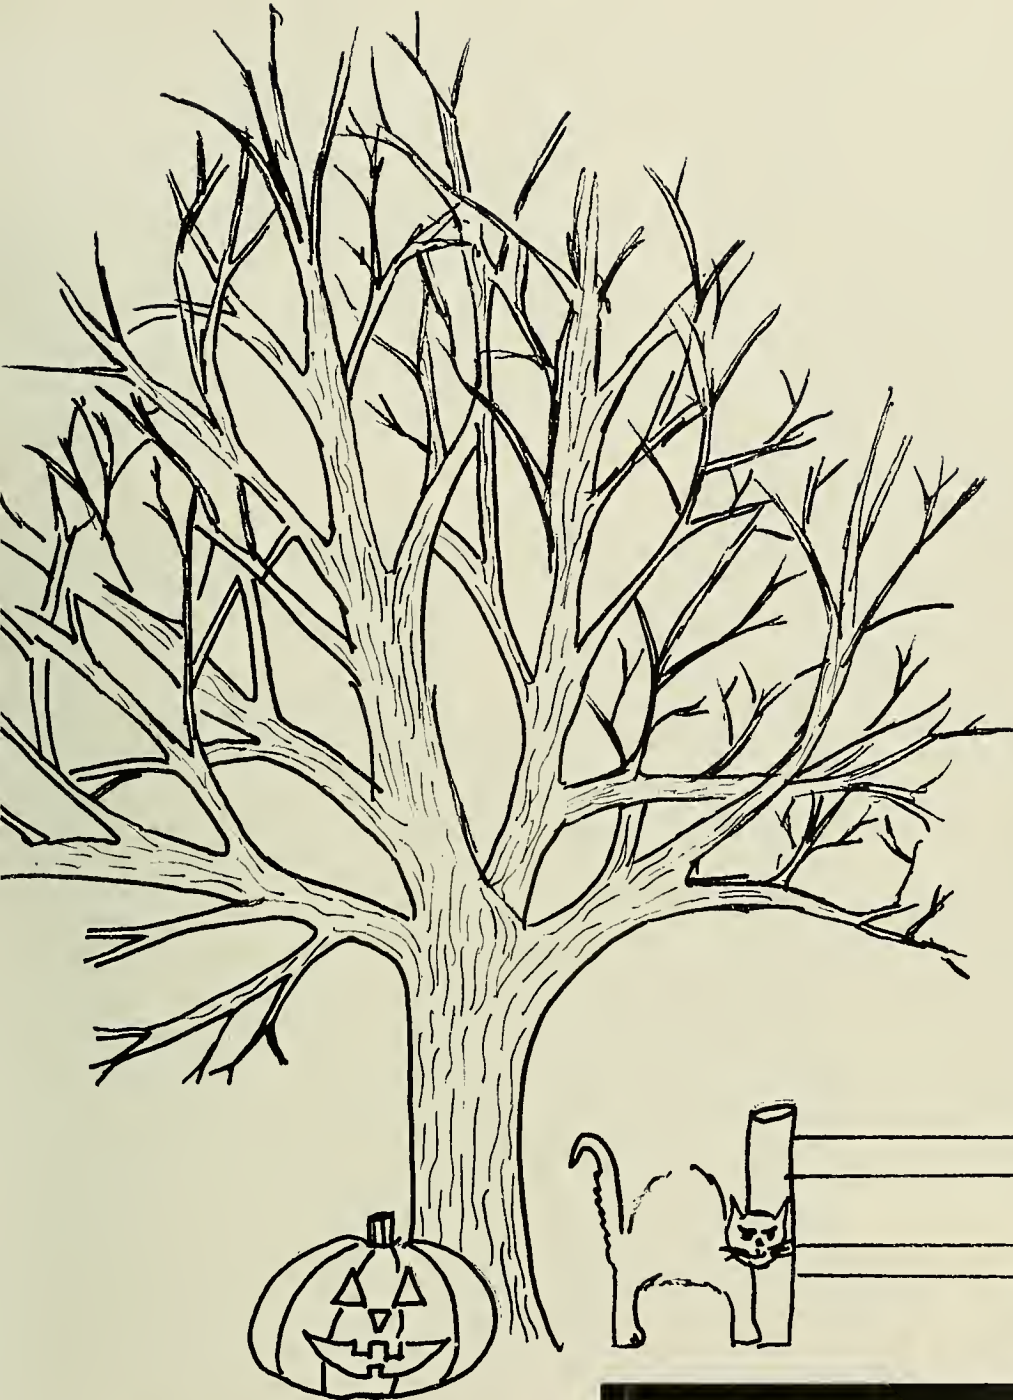

The Fall Picnic was held at Farley Lodge on a sunny October day. Entertainment was provided by "Mr. Bill", a local D.J. from the Pub. Hamburgers, hotdogs, soda and munchies were enjoyed by all. After everyone's stomach was full volleyball, dancing and partying were the events of the evening.

— PUMPKIN — SALE

The Pumpkin Sale, sponsored by the Floriculture Club, was another success this year. A ton of pumpkins, along with dried flowers were sold in front of the Student Union Building. The profits from the sale were used for activities in the club.

H
A
L
L
O
W
E
E
N

The Halloween Party was one of the better parties held this year. It was held in room 1009 of the Campus Center. The room was colorfully decorated with streamers, balloons and a pumpkin on each table. The band, "Sail Cats" provided a variety of tunes. By the end of the night everyone was feeling pretty good!! Clowns, Q-tips, cats, mice, libraries, babies, "Miss Piggy", a lime and a lemon, and the Frat hobo's, were to name a few of the costumes that were worn.

Prizes were given out to the best costume, the most artistic, cutest, the most original, funniest and ugliest.

It is not to be left unsaid, "That people in Stockbridge know how to have a good time."

HOLLY JOLLY

The Holly Jolly was a quiet event that started off with a delicious meal of Steamed chip Beef, with the Chef himself serving it. There was even enough for seconds to be enjoyed by all.

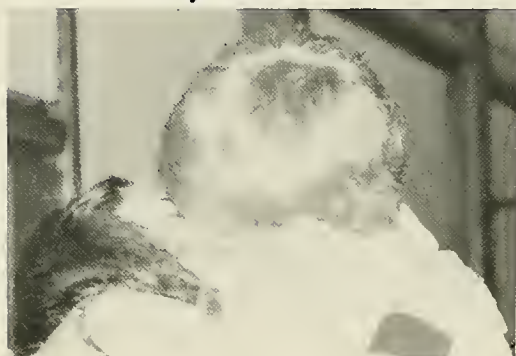

The band, Martian Highway, provided a different type of Christmas cheer and after awhile managed to get people moving.

The highlight of the evening was a Pinatá. A colorful object was brought to the ground by Laurel Fuce, and a bunch of goodies scattered about.

VALENTINE'S DAY DANCE

The annual Valentine's dance was held on Wednesday, Feb. 13th, in the S.U.B. Disc jockey, "Mr. Bill", provided great dancing music from 8:00-12:00 p.m., which ranged in styles to please all tastes. Varieties included everything from modern disco, Rock-n-Roll, and Country, right down to the most appropriate mellow tunes. Yes, Cupid certainly left his mark this night as many couples gathered during the slower sets.

Refreshments were provided to satisfy weary dancers, including free drafts and munchies all night. All in all, a good time was had by everyone attending, certainly a night to remember.

PROFESSIONAL DEVELOPMENT DAY

The Student Senate of the Stockbridge School of Agriculture held its Third Annual Professional Development Day on February 20, 1980.

PDD was a one day event solely organized, funded, and run by Stockbridge Students interested in providing a convention for fellow students, faculty, and professionals of agricultural related fields. The objective was to give students an opportunity to meet with established professionals in the fields they will be entering upon graduation. It was hoped to express the importance of education after graduation because maintaining a knowledge of new methods and concepts is important to all agricultural industries.

The PDD show was initiated three years ago by students who felt there was a need for a professional convention in which students and members of professional organizations could get together and discuss business trends, new practices, problems of the profession and employment opportunities. This first show, held in 1978, was an overwhelming success. Last year's convention doubled in size along with attendance. An audience of over 1,000 people attended with 90% of the student body present. This year the show was advertised in many trade and agricultural magazines or newsletters allowing more professionals to become aware of the show. This gave students an opportunity to talk with exhibitors, speakers, professional association representatives, as well as spectators in agricultural professions.

PDD was composed of an industrial show, featuring indoor and outdoor commercial exhibits, educational displays, demonstrations, club projects

and seminars. Seminars were held hourly throughout the day with each being 45 minutes long. There was one seminar directly related to each of the departments within Stockbridge along with a guest speaker in the middle of the day and a closing speaker. The late morning also offered an additional seminar in which organizations in Massachusetts or New England were represented. This gave students, along with other interested people, an opportunity to find out more about these existing organizations.

Linda Miczek organized PDD this year and was helped by Robert Lunny, Steve Gould and Tom Rullo.

Awards were given out to clubs for their displays. Fruit and Veg. won first prize, Floriculture won second, Turf won third, while Animal Science won honorable mention.

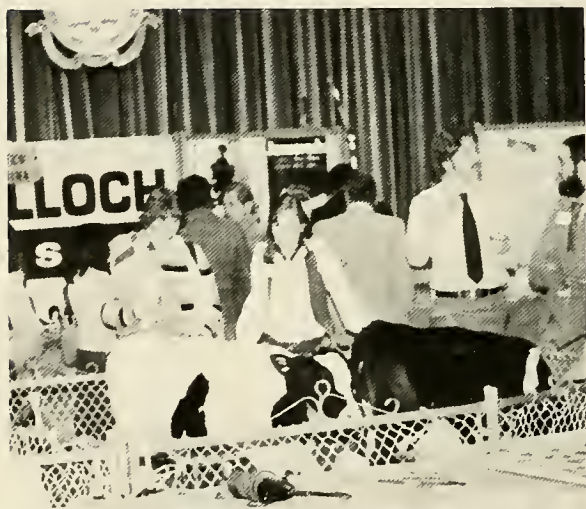

The day was a big success, much was gained by all and it is hoped by all that in the years to come it will be a continued success.

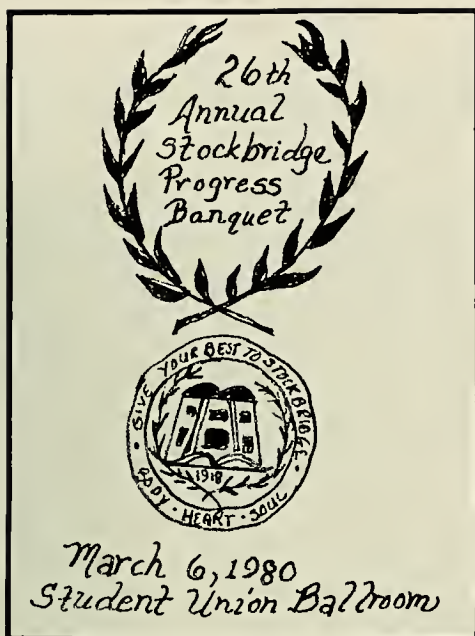

DIFFERENT FACES AT P.D.D.

SEMINARS AND DISPLAYS

The 26th Annual Progress Banquet was held this spring in the Student-Union Ballroom on March 6; just one week before the freshmen left to go on placement. Students selected the most outstanding professor from their major and each of them received an award. Other awards were given out for athletic participation and service to the Stockbridge School, after a delicious meal.

After all the awards were given out and all the speeches were made, the band began to play and kept everyone going for the rest of the evening. Everyone celebrated the giving and receiving of awards and enjoyed dancing and socializing with faculty and friends.

Iona Reynolds presents Linda Miczek the award for outstanding Senator.

Dean Denison presents President Sally Jablonski with a Gavel and half a dozen roses.

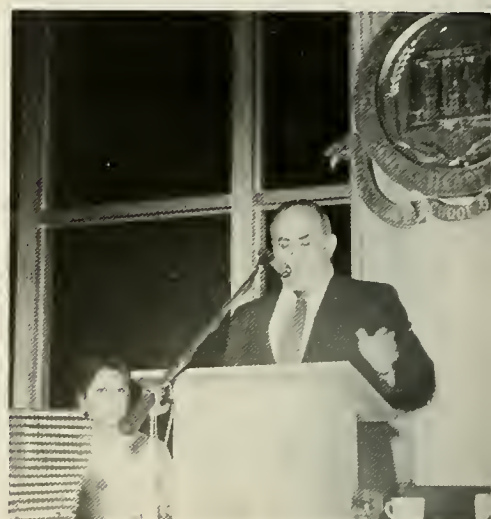

In memory of her husband, James Crockett, Mrs. Margaret Crockett accepts the Yearbook Dedication Award.

PROGRESS BANQUET

- Menu -	
Fruit Cup	
Crisp Green Salad	
London Broil & Sherry Mushroom Sauce	
Vegetarians: Broiled Scrod & butter	
Baked Potato; Peas & Pimientos

SPRING PHONOTHON

"You've got to be kidding!"

Terry chats away

The spring Alumni Phonothon was held in April eighth through the tenth, in the Alumni Hall. It is a very successful fund raising activity where you have the chance to talk to Stockbridge Alumnists about their years' here. Everyone has a good time partying and sharing with one another.

BAY STATE LIVESTOCK CLASSIC

The Bay State Livestock Classic, put on by the Animal Science Department, was held on April 25 and 26 in the Grinnel Arena. The students really worked hard for weeks, but their efforts certainly paid off. There was judging and showing of cattle, pigs, sheep and horses. The students groomed and trained their animals before the show, then paraded them around the arena while the judges inspected them.

There was quite a bit of excitement after the hog show, because some of the slippery creatures decided they weren't going back into their trailer. Their trainers kept cool and finally got their squealing pigs back where they belonged.

In the evenings, there was a bucking bronco ride, made from a barrel with a saddle strung from the ceiling with ropes. Four or five guys tugged on the ropes, giving you quite a ride. Very few people were able to hold on long before winding up in the sawdust!

Refreshments were served to the audience; all around, everyone had a great time.

A proud trainer.

Third Place!

Unsuspecting photographer, Steve Gould.

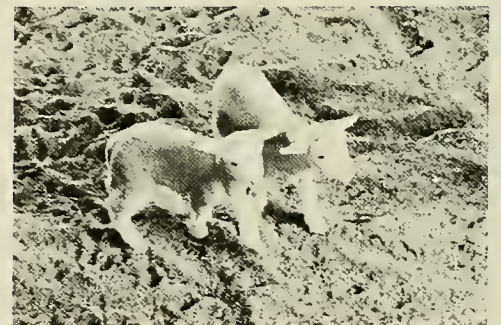

"Come on, Smile!"

"Hold on tight, Brian."

SPRING PICNIC

The Spring Picnic was held on a beautiful sunny day in April at Farley Lodge. It began in the afternoon and continued well into the night. The picnic started off with a volleyball game, and a delicious barbecue of hamburgers and hotdogs. Later in the evening, everyone was dancing to music put on by D.J., Mr. Bill. Much of the faculty came to enjoy the fun, even the Dean was there checking out the motorcycles.

One thing can be said for Stockbridge students, they know how to have good parties!

Hi There!

“Mr. Bill”

Dean Denison, ready to ride.

"BIG BEEF"

Hey! Wait a Minute Don't take my picture.

I dare you to take my picture like this ...

Come on Elaine, SMILE!

Have a coke and a smile!

ALPHA TAU GAMMA

PLEDGE FORMAL FOR ATG . . .

The brothers of ALPHA TAU GAMMA, the only fraternity founded by and exclusively for Stockbridge students in 1919; held their Pledge Formal on March 8, 1980. It is only one of their many parties and social events.

The evening began with a toast to ATG, and all its brothers. Then came a delicious sirloin steak dinner preceeding the Awards presentation. Following the various awards, the freshmen were given their Brother Certificates.

At the head table were seated the Master of Ceremonies, and Vice President of ATG; Wayne LaCroix. House President, Jeffrey T. Skillin, Corresponding President, John G. Boldebook, class of 1965, and guests.

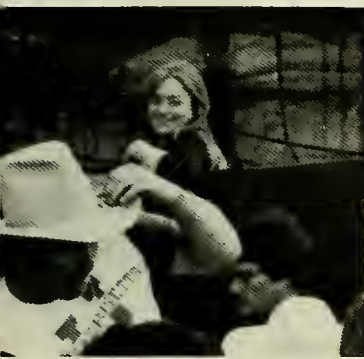

After awards were presented, drinks and dancing finished out a super evening.

ARBORICULTURE AND PARK MANAGEMENT

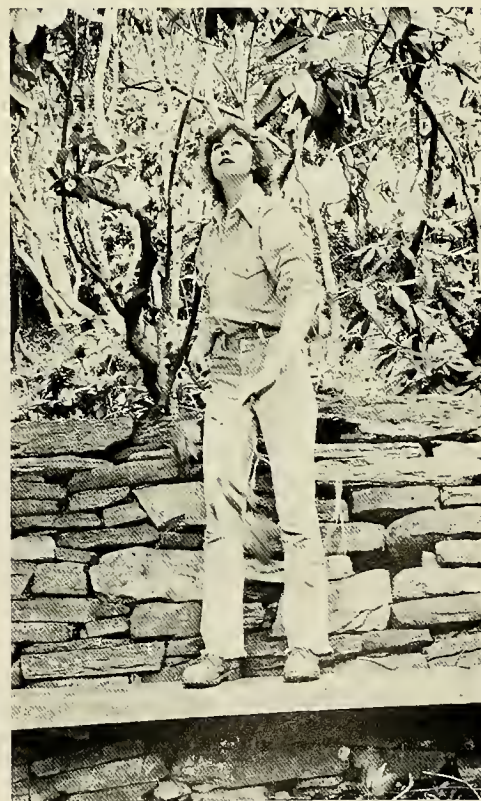

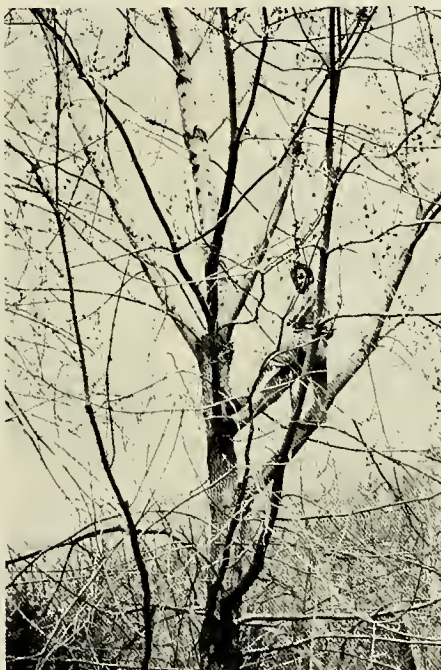

Arboriculture and Park Management are two closely related fields.

Arboriculture majors study care and maintenance of shade and ornamental trees. People are becoming more interested in their landscapes, whether its their home, city or recreation areas.

Park Management is closely identified with Arboriculture. Students study various aspects of land use and planning, general forest management, park formation and expansion.

In addition, Arbor students are taught to skillfully and safely use ropes and operate a chainsaw.

Though the job market is tough, these students are professionally prepared to meet the needs of the public.

FLORI CLUB

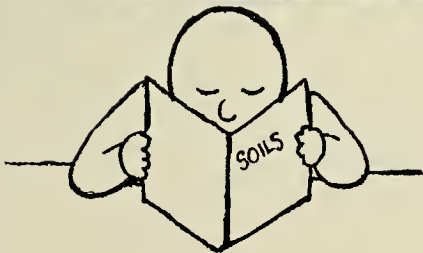

The Floriculture Club, led this year by President, Steve Calautti, put together and sponsored several events. In the fall, the club sold a ton of pumpkins along with dried flowers in front of the SUB. It was a beautiful day to sell pumpkins and everyone had a good time.

In November, the club took a weekend field trip to Falmouth, Maine. They visited many greenhouses in the area, all of which had many unique features. At night they partied and made the weekend, a trip they will never forget.

In December, the club sponsored the French Hall Christmas open house. On display were many beautiful arrangements, wreaths and alcove displays; all of which were made by the Retail Design Class. The response was overwhelming and the whole show was a great success.

For PDD the club set up a booth on conservation in the greenhouse. The booth was very informative and drew much attention. They were awarded the second place ribbon. The other officers in the club include: Vice President, Tom Ahern; Secretary, Cathy Senger; and Treasurer, Diane Sirkin.

PERSONALITIES

STOCKBRIDGE

TURF CLUB

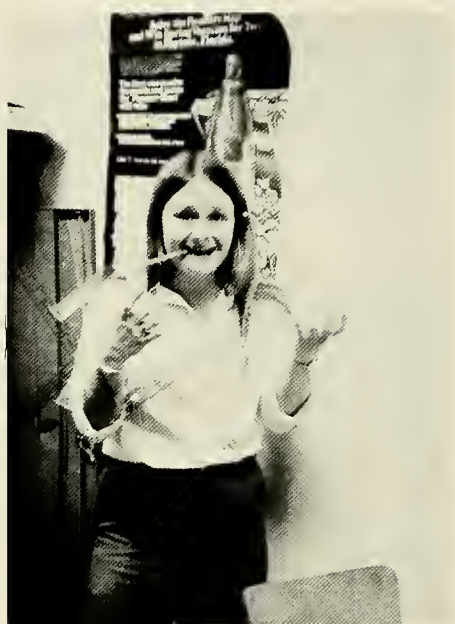

The Freshman semester the Turf Club was very active, having bi-weekly meetings which consisted of bringing in a speaker from the turf field, and then having a short meeting afterwards covering current issues. A yearly turf outing takes place each Fall for all members of the club. The outing consists of playing a golf tournament, then a dinner, and a meeting concluding with a party.

Every year a meeting takes place covering placement training. It's an informal meeting in which all seniors tell about their placement experience.

80'

YEARBOOK

ADVISOR

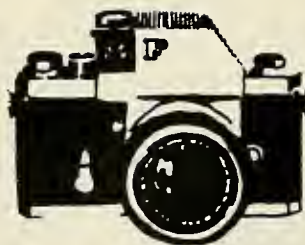

His concern and dedication, not only to us, but to the students and the Stockbridge School is unique. Something special can be said for those people who put themselves out that much more and volunteer to help in student activities, when others would shudder at the idea. It is a rewarding experience to work with someone personally as well as professionally, because everyone benefits from the experience.

Associate Professor Edward Pira, is one of those people who has always stepped forward when organizations have needed assistance in their endeavors. He has taken on a difficult task this year of putting together a successful collection of memories for the past two years of our college life. The STOSAG Staff would like to extend our sincere thanks and gratitude for his assistance at the staff meetings and hope he will continue to be involved with student activities. Thank you, Dr. Pira.

Editor's Note;

First off, I'd like to thank the staff. All the photographers and writers; (Dave Harting, Steve Gould, Ginger Belanger, Diane Sirkin, Anne Lospennato, and Steve Callautti). Also, I'd like to express my appreciation to Professor Edward Pira for all his support and encouragement. We owe thanks to last year's editor, Paul Donnelly and Jerry D'Annello who thoughtfully gave their time and advice to us.

Everyone put in a lot of hours and some frustrating moments. But with cooperation we succeeded in finishing, (later than we had hoped), an interesting yearbook.

I'd like to give a special thanks to Bette Davis, for all her time and effort in this project.

I would like to personally thank each and every person who contributed to this yearbook. But since I'm limited in space, I hope this serves as a great big THANKS TO ALL OF YOU!!!!

THANK YOU,
TERRY GIRARD

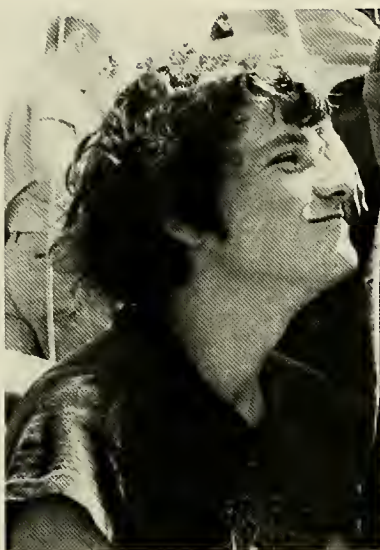

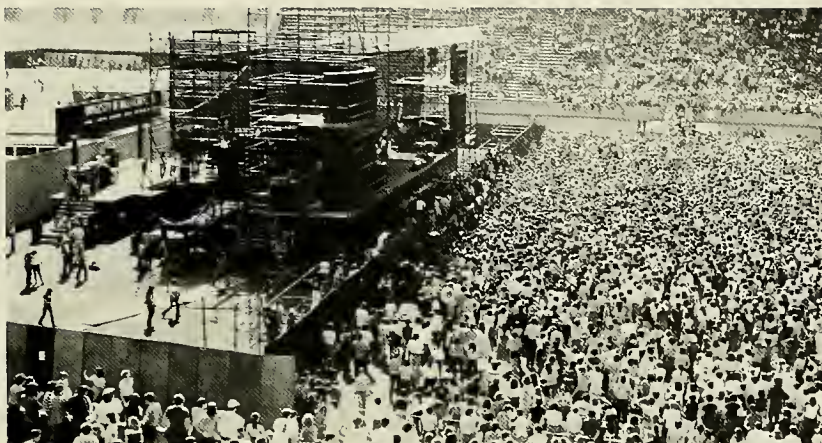

QUAD DAY

SPRING CONCERT

The 1980 Spring Concert was held on a hot, sunny day in April in the football stadium.

Bonnie Raitt and the Allman Brothers provided excellent tunes for everyone to party to.

GOVERNMENT

STOCKBRIDGE CLASS GIFT

The Graduating Class of 1980 presented their class gift to Stockbridge late in May. The gift was a lovely Schwedler Maple, which is a variety of the Crimson King Maple. It is a handsome, hardy tree with reddish-green foliage.

Many seniors and faculty members got together to lend a hand planting the tree.

Supervisors?

AND UP IT GOES!

A Job Well Done.

May the road rise up to meet you,
May the wind be always at your back,
May the sunshine warm upon your face,
The rains fall soft upon your fields,
and until we meet again . . .
May God hold you in the palm of his
hand.

CONGRATULATIONS TO THE CLASS OF 1980 . . .

Class President, Marsha Penas welcomes guests and graduates.

President of the Senate: Sally Jablonski.

COMMENCEMENT

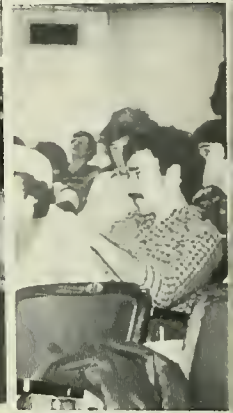

On May 23, 1980, Stockbridge School of Agriculture held its Fifty-Eighth Commencement in the beautifully decorated Concert Hall in the Fine Arts Center.

It was a very warm ceremony with guest speaker, Congressman Silvio Conté, and a speech from class President, Marsha Penas.

With all the guests and relatives present Assistant Dean Iona Mae Reynolds, and Dean John Denison gave out the Diplomas and received kisses and handshakes in return.

Even though for many of us it meant Good-byes to close friends, it was a very enjoyable graduation which we'll remember for many years to come.
